

Installation

- 1** Turn off the mobile phone.
- 2** Remove the battery.
- 3** Do not remove the protective film.
- 4** Install BatMax inside the battery compartment. ▶ See **B**
- 5** Re-install the battery.
- 6** Turn on the mobile phone.

**Important Notes**

- A** Do not cover the electrical contacts of the battery.
- B** The active side of BatMax (white with the BatMax logo) must face the battery.
- C** BatMax can be cut out and must cover 60-80% of the battery.
- D** Several charging cycles (5-10) are required for a visible battery life improvement.

BatMax's effect and performance may vary and depends on several factors:

Type of mobile phone, brand, model - type of battery, age, status (total amount of charging-discharging cycles), external temperature, environmental conditions and cellular network.
